Build Responsive Real World Websites with HTML5 and CSS3

PROFILE

I have a strong passion for web technology and internet. I love to use technologies to create applications that bring benefits to people, to solve problems for customers.

I'm self-taught my web development skills via online cources, books, Youtube and Google.

Besides many mini projects that I built along with those online courses, I know that I still haven't had many experiences in web development. But I'm always willing to learn, practice and improve my skills everyday.

With my foundational knowledge and skills, I believe I can learn and adapt quick to the company's work requirements and can contribute to the development of the company.

My goal is to become a full-stack web developer and become an expert in the profession.

WORK EXPERIENCE

- Create projects using HTML5, CSS3, vanilla Javascript.
- Use SASS.
- Create web themes such as product landing pages, websites with multiple pages.
- Create responsive websites using relative units, media query and Grid, Flex layout.
- Create apps using ReactJS with Redux and React Hooks.
- Use Bootstrap.
- Use JQuery.
- Basic understanding of Github version control.
- Basic knowledge in NodeJS, Express, MongoDB, MongooseDB.
- Able to communicate in English.
